1, see 2

STATE

The figure consists of two side-by-side line graphs. Both graphs have 'Rate of reaction' on the y-axis and 'Temperature' on the x-axis. The left graph shows a bell-shaped curve that starts at a low rate at low temperatures, rises to a peak at 30°C, and then falls as temperature increases further. The right graph shows a curve that starts at a low rate at low temperatures and rises steeply, becoming nearly vertical as it approaches 30°C, after which it levels off at a high rate.
